

Prada cordially invites you to Train like a Tour pro

We would like to reward your trust by giving you the opportunity to play your best golf. Immersed in the beauty of Switzerland you will train like the Pros with the world leading experts and benefit from their knowhow and cutting edge technology.

During a day you will train with 2 golf professionals using the same Sports Science which the Pros receive by Tour Coaches:

6D GOLFBODYDYNAMICS

Using precise sensors to track both your body movement and the club in space.

By learning to move in a more efficient way you will be able to gain more distance, become more consistent and avoid injury. Biofeedback training will translate instruction into feels and thereby enable you to learn faster.

Duration: approx. 8hrs

Dates: Any available dates

Location: Different locations in Switzerland

V1 SPORTS PRESSURE MAT

Understand how you can apply force and pressure in order to accelerate the club.

The body track system will enable you to see and feel the changes you need to make in order to gain power and consistency. Great to improve both your long game and short game.

3D K-COACH

K-Coach allows us to measure what your body is doing in 3D, build an improvement plan for you to follow and train the movements that are specific to your swing. Biofeedback assists you to make the correct movements and provides you with the correct feel that you can recreate your own. It's perfect practice every time. The K-Coach has an extensive library of preloaded drills and exercises to help you improve faster.

QUINTIC BALL ROLL

Quintic Ball Roll software utilizes a high-speed camera tracking the golf ball for the first 16 inches of the putt and the putter head, both pre and post impact. The software then automatically provides all of the information you need regarding the putter and ball, both graphically and numerically to guide you to your best putting.

TRACKMAN

Trackman is the choice of the golf industry's top players, coaches, club fitters, equipment manufacturers, and organisations.

A doppler radar that tracks both the golf club and golf ball giving 27 different parameters. The rich data gathered by the trackman allows accurate information to be given, taking out any guess work. Allow us to guide you through your numbers and optimise your game. Improve distance off the tee, distance and control with your irons, spin and distance control of your wedges.

Info for Prada:
